No. 26.

LIVE WIRES OF CALIFORNIA CHAPTER HOLD MEETING.

Officers Elected and Much Other Business Transacted.

There were thirty-three present, and there should have been forty. Several of our old stand-bys like Hollister, "Tiny" Thornhill, Broughton, Lachmund, etc., were unable to come at the last minute. During dinner we had two ladies present, Mrs. Lyn-ton (Virginia College) and Mrs. Hess (University of Michigan) who entertained us during the dinner with piano selections. Mrs. Hess also played the accompaniment for our songs, i. e., "Mining Engineer," "I've been working on the Railroad," "Good-night, Ladies," and "My Bonnie," which were sung between courses. This added a lot of "pep" and gave everybody a chance to make a noise.

After the dinner held March 15, the men, whose first dinner this was, were asked to get up and introduce themselves by telling us a little something about themselves and their work, etc. The new men present were, F. O. Blake, Stephen Burke, Granville Johnson, Wilson, T. I. Phelps. Then the speaker of the evening, Dr. Scott Boyce, was introduced and spoke to us for about a half hour. His subject was "Your Job and Your Health." It was a most enjoyable talk, and the comments made afterwards were that we should have a speaker at all future dinners.

Following Dr. Boyce's talk, "Jim-mie" Keelyn told us the latest news from alumni in the southwest whom we either know or have heard about. For example, Hollister is on Catalina Island in charge of Wrigley's (of chewing gum fame) lead-zinc mill; Prof. Eggleston is at Riverside teaching; Bill Porri is in Mexico; C. L. Conway is in Sweetwater, Texas. Regrets were read from D. C. Jackling and Wishon, also greetings from Laizure, Bob Mook, and Chapin from San Francisco. Two interesting letters were read from Cushwa and Bobbie Allen with news from the latter regarding alumni in Arizona.

The election of officers for 1926 resulted in my being elected presi-

Continued on Page Three.

LECTURES ON METALS.

Interesting Talk and Demonstrations Given by Clayton and Assistants.

Many and various metals and alloys have become a necessity to our everyday life and some which were rare or almost unknown a few years ago are now plentiful and commonplace. The nature and use of these metals and alloys was discussed by Prof. Clayton on Thursday evening in the Metallurgy building as the regular hour for the General Lecture course. A rather extended classification of metals was given and the important physical properties of the different kinds of metals were pointed out. Lantern slides were used to show the structure of some of the important metals and the arrangement of the atoms within the metals.

In the laboratories, demonstration smelting of ores for recovery of lead, gold, and silver, concentration of lead ore by means of the Diester-Overstrom table, electrolytic deposition of zinc, and the testing of steel was illustrated.

Professor Clayton was ably assisted in his work by "Cap" Hanley, Dave Walsh, "Pat" Kennedy, Don Griffin, P. D. Vern, Jimmy Crawford, Sam Wightman, Sam Williams, Erwin Gammeter, and Bob Miller.

RETURNS TO M. S. M.

Dr. J. W. Stephens Again to Lecture Before Student Body.

The next lecture in the General Lectures series will be held at Parker Hall, April 1, at which time Dr. G. W. Stephens of Washington University will speak on the subject, "Present Social Forces and Their Significance." Dr. Stephens, who has spoken in Rolla several times in recent years, is in great demand as a speaker in and around St. Louis.

This lecture, which will include an analysis of the forces in the social, political, and ethical fields, a discussion of the Italian situation, etc., will be a real treat for those who attend.

YOU CAN HELP TO MAKE A NATIONAL CHAMPION.

Subscription Money Sending Craig to National Championships.

Sammy Craig, Miners' doughty lightweight contender for the National wrestling championship, and Coach McCanless will take the trip to the N. A. A. U. grappling meet in Corvallis, Oregon, on April 15, 16, 17. The sum of five hundred dollars has been set as the goal for expenses to be raised by subscription. The fraternities and clubs are being canvassed and lists are now available for others wishing to contribute to the cause.

Sammy's chances for the championship and the putting of M. S. M. on athletic pages all over the country are exceedingly bright. Craig's only "defeat" was an acknowledged poor decision in favor of last year's National Champion, Bringham, of Oklahoma A. and M.

Coach E. C. Gallagher of the Oklahoma Aggies made known the fact that Sammy in the lightweight class would be next to impossible to beat. This sentiment was expressed in a recent letter to Athletic Director Dennie. Coach Gallagher knows whereof he speaks, backed by a nationwide reputation as producer of last year's National Inter-collegiate Championship team. Coming from such an authority, this opinion of Sammy's calibre takes a double strength.

Can M. S. M. afford to lose this opportunity for countrywide athletic recognition? Emphatically no! Sammy Craig deserves this reward for his ability and under Coach McCanless' able coaching we may rest assured of a good result. Will M. S. M. heed Horace Greely and tell Sammy Craig, "Go West, young man, go West?"

In Love?

A co-ed engineer expresses it this way: "When I first fell in love I felt as if I were in a tunnel with a train of cars coming in both ways and no way out."

HERE'S TO YOU, GRADS!

To the M. S. M. graduates of the classes of 1907, 1908, 1916, and 1917, this number of The Miner is respectfully dedicated. The State following your name is taken from the last published Register of Graduates.

Class of '07.

Miners.

A. B. Bartlett, Wyoming.

P. R. Cook, California.

A. P. Fellows, Missouri.

W. P. Hatch, Massachusetts.

W. C. Richards, Missouri.

E. R. Wash, Pennsylvania.

I. L. Wright, New Mexico.

W. E. Brown, J. C. Long, J. P. Seebree, T. C. Tseung, A. G. Baker.

Metallurgists.

J. T. E. Ericson, Pennsylvania.

W. I. Phillips, California.

A. J. Seltzer, Oregon.

S. Sunada.

Civils.

E. E. Cook, Missouri.

W. C. Perkins, J. T. Vitt.

General Scientists.

J. B. Scott, Missouri.

Class of '08.

Miners.

R. R. Benedict, Illinois.

J. H. Bowles, Missouri.

G. H. Boyer, Wisconsin.

H. A. Johnson, Nevada.

E. E. Jones, New Mexico.

G. F. Kellogg, Illinois.

H. T. Mapes, Mexico.

H. T. Mann, Oklahoma.

W. B. Mix, Kentucky.

C. R. Wood, Wyoming.

F. A. Moore, California.

E. P. Murray, Washington.

A. L. Nye, Nebraska.

J. J. Sandford, Idaho.

M. Sedivy, Ohio.

E. B. Thornhill, California.

F. L. L. Wilson, West Virginia.

H. Zirulick, C. A. Baker.

Civils.

J. D. Fowler, Texas.

P. A. Philippi, Missouri.

D. M. Neer.

General Scientists.

D. P. Hynes, Illinois.

B. Dudley, New York.

C. L. French, Arkansas.

F. W. Harper, California.

Class of '16.

Miners.

R. S. Burg, Texas.

E. G. Deutman, Wisconsin.

J. J. Dowd, Illinois.

W. Gammeter, Missouri.

C. B. Gold, Illinois.

J. L. Head, Chile, S. A.

J. S. Hoffman, Iowa.

O. L. Lumaghi, Missouri.

W. H. McCartney, Florida.

J. C. Miller, Oklahoma.

H. A. Neustaedter, Missouri.

C. A. Pierce, Arizona.

C. G. Stifel, Illinois.

G. E. Ude, Missouri.

H. H. Vogel, New York.

W. W. Weissbach, Missouri.

H. T. Marshall.

Metallurgists.

G. E. Johnson, Indiana.

H. E. Koch, Missouri.

E. J. McNely, Illinois.

C. E. Peterson, New York.

Civils.

B. L. Ashdown, Missouri.

E. L. Beyer, Kansas.

E. V. Damotte, Illinois.

L. N. Hoppock, Iowa.

T. P. McCague, Illinois.

J. R. Maher, Iowa.

D. H. Morgan, Missouri.

E. L. Sailer, Missouri.

J. M. Schuman, Missouri.

General Scientists.

B. W. Adams, Ohio.

A. T. Dunham, Missouri.

G. Erskine, Missouri.

F. Grotts, Illinois.

E. A. Kayser.

Class of '17.

Miners.

J. H. Bock, Florida.

J. S. Brown, New York.

R. Dale, Illinois.

P. B. Dolman, Oklahoma.

A. C. Fernandez, Mexico.

D. Greenberg, Louisiana.

W. Guest, Oklahoma.

R. C. Henschel, Kansas.

Continued on Page Nine.

Continued from Page One.

dent, James L. Keelyn vice-president, and H. F. Valentine secretary-treasurer.

Following the election, the meeting was thrown open for informal discussion, the results of which are as follows:

(1) Unanimous support to the suggestion that the "Miner" football team schedule a game in Los Angeles.

(2) A local employment bureau was formed. Any "Miner" who comes to Los Angeles, should report to H. F. Valentine, City Engineer's office, 2nd and Broadway, Los Angeles, (Phone Metropolitan 5200, Station 172). Also any local M. S. M. men in Southern California who are in need of an engineer or know of a job will notify Valentine.

(3) That applications for membership in the M. S. M. Alumni Association be requested from you. It is believed that more members can be signed up at one of these dinners, and dues collected, than can be done by correspondence from Rolla. Therefore, we request authority for our Secretary-Treasurer to sign up members in the M. S. M. A. A. and collect the dues, which would immediately be forwarded to Treasurer Clayton.

(4) A great part of the evening was given over to a discussion as to some constructive criticism regarding courses which are now being given at Rolla. From the experiences of graduates present, covering a period of over twenty years since graduation, many helpful suggestions were made. A committee was appointed to sift the mass of evidence on hand to see if out of all this some courses now being given at school might not either be eliminated, improved or new ones included in the curriculum. The consensus of opinion is that the questionnaire sent out by the School some two years ago was entirely too lengthy and complicated. For that reason, only a few were returned to the School. The men on this committee are Floyd D. James, chairman; Paul Lindau, Valentine, and Hogo-loom.

(5) A wire was authorized to be sent for delivery to St. Patrick from his faithful followers in Los Angeles.

The meeting adjourned at about 11:45 P. M. without one man leaving early. This tends to show that every one present was vitally interested. During the informal talk, Floyd James, who had lately been to Rolla, advised us that Col. Charles L. Woods expects to be in Los Angeles for the newspaper editors' convention in

May. We are writing Col. Woods to advise us of the dates of his stay in Los Angeles, so that we can have another alumni dinner and have him as our guest of honor. If Col. Woods can see his way to do this, I believe we will have a large number present.

E. D. LYNTON.

PLANS BEING MADE FOR SENIOR TRIP.

Complete Schedules Not Yet Available for Publication.

Although no definite details have yet been worked out, most of the departments have a general idea of the places the seniors will visit. They will leave Rolla on the first or second of May.

The Metallurgists are going to Chicago.

The Miners and Geologists are going to St. Louis where they will visit some of the coal mines in the vicinity. From St. Louis they will go to Flat River to inspect the lead mines and mills.

The Chemists will go to Pittsburg and Cleveland.

The Civil Engineers are going to Chicago and possibly to Milwaukee. They intend to drive and look over various Civil Engineering projects along the way.

The Electrical Engineers will go to St. Louis where they will visit various electric manufacturing plants and power plants.

Additional information will be available later.

WANT TO GRADUATE?

Twenty-five Seniors are not yet cleared for graduation.

H. H. ARMSBY,
Registrar.

JUNIOR PROM.

As the last few touches bring out the work of art in a painting or piece of sculpture, so the Junior Prom fittingly closes the St. Pats program.

Gone are the grotesque costumes of the previous night; the girls are beautifully gowned and the fellows superbly tuxed. Teasing melodies floating through the air coax gliding feet to do their bidding. The very atmosphere is surcharged with the essence of tingling pleasure.

On the morrow the holidays will end, good-byes and farewells will be in order, those last few moments, so precious just before parting, will pass, and then back to the grind again. Complete abandonment of

thought for the future is the urge—live, enjoy, and dance while we may the remaining few hours away.

The Junior Class, well pleased if you have enjoyed their entertainment, now bids you adieu and hopes that you may return for the festivities next year.

Editor's Note—This column is a medium through which The Miner readers are invited to express their opinions, sentiments, or anything pertaining to M. S. M. Articles must be signed, but names are printed only with the consent of the writer.

As an off-campus interested observer I wish to express a few thoughts concerning the recent St. Pats celebration. Certain phases of this greatest of all the year's events are a credit to the Junior class and to the School of Mines; other parts of the celebration are not so creditable and if brought to the attention of next year's Junior class such mistakes are not likely to occur again.

At any rate, St. Pats is over, "thank hevvings," though the outside decorations were a fizzle (the first time in years), the "parade" functioned without a band (the first time in years), the orchestra and interior decorations were not up to standard, the price of St. Pats buttons and tickets was raised from \$2.00 to \$2.50, and the seniors were left to "find seats if possible" at the play.

might well suppose that the present Sophomore class will profit by the mistakes of the Class of '27, and I doubt not that such will be the case; for, among my few Sophomore acquaintances are numbered some half a dozen enthusiastic, imaginative, honest men who apparently have considerable executive ability and who, if given supervision of St. Pats activities in 1927, will make interesting history for future Miner and Rollamo readers. —A. B. C. Z.

M. S. M. Gets Excellent Advertising by Broadcasting Efforts of Local Talent.

The number following this was a vocal solo by Mrs. W. D. Turner, assisted by Miss Edith Jones at the piano. Following this the Varsity orchestra played several selections, including the Mining Engineer.

Prof. H. H. Armsby here presented the new school song, "Silver and Gold," written and composed by himself. Mrs. Turner sang the song while Prof. Armsby played the piano accompaniment. Prof. C. R. Forbes gave an address on the importance of metals. Referring to mining he said that M. S. M. is one of the foremost institutions of its kind in the world.

Absence makes the marks grow rounder.

ALL AT THE
BUNCH BARBER SHOP

TRY US ON A RUSH ORDER

MEDITATIONS FROM A FLORIDA ENGINEER.

Were you ever on a concrete job,
When the mix was running bad;
When the sand they sent you was too
dam fine,
But they swore it was all they had;
When your foreman was down with
a broken arm,
And the men weren't working well;
And the boss was due around that
day,
Any you knew that you'd catch
blue hell?

When the mercury stands at a hun-
dred and three,
And the hose lines crack and are
gone;
And the cement gets low, and the mix
gets worse,
And the steels shipped in all wrong;
And the cracks open up where they
shouldn't be,
And the forms warp up at night?
Then it does no good to sit and hope
That the job'll turn out all right.

But such is the luck in this end of
the game,
And you often wonder why
That you stick it out, day after day,
Till your time comes 'round to die.
While you worry and work, and
sweat and slave,
And the pleasures of life are lost;
To build those things for the use of
Man
Who'll never count the cost.

And when the last batch is puddled
and set,
And the final estimates check;
And you lie down to die in some far-
off spot
With no home but a rough board
shack;
Then for you the game is over,
And for you your race is run;
But the good Lord will know,
By the structures you've built,
What kind of a race you've run.

"MIKE" MIKELL.

TAILINGS.

The outfit is starting to recover
from St. Pats. The only trouble seems
to be that the pros seem to recover
quicker than the students. This
should be corrected in some way or
other—it produces a terrible result
all around.

Pete's Spanish classes are under-
going a depression. Probably they are
waiting for him to dye his hair again.

Spring is here, notwithstanding the
cold weather; the Honk-a-Tonk has
a fresh coat of paint.

After being diagnosed as every-

thing from mumps to malaria, the re-
cent epidemic has ceased to exist,
with the exception of a few relapses
(caused by St. Pats!)

The School of Mines had a fine
chance to turn out in force last Fri-
day morning, when they assisted the
great and noble Rollie Fire-Depart-
ment in putting out a four-shingle
fire on Main St. Excitement was rife.
"Ears" Orten lost fifteen minutes of
valuable time out of his economic
quota of fifty—that class never woke
up so quickly in the history of M. S.
M. Fourteen dishes were broken in
transit from the house to the side-
walk, and plenty of holes were chop-
ped in the roof of the house in order
to facilitate the draft of the fire—
otherwise everything passed off
harmoniously. One of the firemen did
get his feet wet, however—it was an
unavoidable incident.

"Thanks for the buggy-ride—!"

ACKNOWLEDGEMENT.

The Junior Class wishes to acknowl-
edge its sincere thanks to all those
who had a part in making the recent
St. Pats celebration a success. Those
of the Junior Class who shouldered
the responsibility and did much of
the work are included in the follow-
ing committees:

Finance Committee.

Paul L. Hopper, Chairman.
Ralph E. Hilpert.
William L. Rushmore.
Sam D. Hodgdon, Jr.
John E. McCauley.

Dance Committee.

Bob McCaw, Chairman.
W. A. McCanless.
Court Walters.

Decorations Committee.

John Heckman, Chairman.
E. W. Parsons.
B. L. Chaney.
William L. Rushmore.

In the knitting ceremonies Ralph
E. Hilpert acted as St. Pat, Phil Boyer
and Paul L. Hopper were guards,
and the pages consisted of M. J.
Paul and Gerald Reardon.

In the crowning of the queen, Hil-
pert was St. Pat, Frank Seydler and
Albert Barnard escorted Miss Helen
Baysinger, the first queen, and B. L.
Chaney and Sam Hodgdon, Jr., were
escorts to last's years queen, Miss
Helen Underwood. Escorts to the
Maid of Honor, Miss Lorraine Love,
were Bob McCaw and Ray Johnson.

LIQUOR-DRINKING AT M. S. M.

The much-discussed question of whether prohibition is a success or a failure comes to mind when we view St. Pats in retrospect. It would of course be out of the question to endeavor to draw comprehensive conclusions from observations made on our recent festival. Judging by the St. Pats celebration and by other social events over a period of some months, however, we feel safe in saying that drinking is decidedly on the decline among the students at M. S. M. Comments have been heard from visitors, faculty members, and townspeople on the absence of liquor from the house parties and dances during St. Pats, and the students are to be commended on this. Colleges and universities have at times received much unfavorable publicity due to drink-

ing bouts and parties, and although students as a class are not the chief violators of the Eighteenth Amendment, the colleges stand in the full glare of the limelight and receive the unsavory notoriety due to liquor parties and the scandals in which they often end.

We do not intend to create a false impression or to intimate that drinking has ever been a great evil among the students at M. S. M. It has never been necessary for the faculty to take drastic action against drinking here. The average student has a definite purpose in attending M. S. M. and is here for business. The fact that the Eighteenth Amendment means something at M. S. M. and the creditable manner in which the big celebration was staged is worthy of comment. We take pride in the fact that our school is a leader in the field of Engineering. We might also take pride in the fact that no faculty coercion is necessary to prevent the promiscuous use of liquor in our campus activities.

OBEDIENCE.

One of the hardest things to learn is obedience. No man is fit to command who does not know how to obey. One example is worth a thousand sermons. If the employees see their superiors disregard the rules and regulations they will disregard them likewise. A rule that must be enforced must apply to all without exceptions, otherwise there will be a feeling of grievance and injustice. As future engineers we expect to handle men, so it behooves us to learn how to obey. Then we will not be so apt to make many harsh and onerous regulations to strain our authority and reputation.—Exchange.

A FAIRY TALE?

Well Children,

Once upon a time Doctor Fulton, Director of the Missouri School of Mines and Metallurgy, was seated before the open fire-place engaged in his favorite pastime of reading about ancient man and his work.

The telephone rang and in reply to his usual "commence please," in anxious voice asked, "Doctor, could you please help me solve a problem that is slowly getting the best of me?"

"Suppose you state what it is and I will see if I can."

"All right. In the first place I am a Sophomore in school—"

"Very good, I'm sure," murmured the Doctor, thinking it some after-

math of St. Pats.

"Now Doctor, it takes me 40 minutes to go and come from school every day, eight hours to sleep, 30 minutes to get up, shave, get dressed, and get down stairs in the morning; it takes an hour and a half to eat breakfast, lunch and dinner. That's a total of eleven hours gone. I have an average of 6 hours of classes every day, which makes 17 hours gone."

He paused a moment, then continued: "It takes two hours to work Physics problems, two hours for Calculus, an hour for English, an extra one or two hours on the plates for Civil Engineering drawing, one hour working problems and studying the text for Railroads, and one hour on Military. I belong to one or two campus organizations and am supposed to attend all class meetings, football rallies, and mass meetings.

"I like to attend a show and have a date with my girl once in a while. The nearest I can figure, a week only has 168 hours, while my week should contain 245 hours; that makes me 77 hours behind. Then for every week since September I have lived 3 days and 5 hours more than is shown on the calendar."

Just at this instant the sophomore heard a peculiar sound as if someone was gasping for breath. The next day, children, it was rumored that Doctor Fulton was organizing a relief expedition to rescue the poor student at M. S. M.

According to authorities of Colorado State Teachers College, five minutes is ample time for a young man to say farewell to any young lady.

The University of Oregon has the newest thing in clubs. The only eligible members are those football substitutes who never left the bench during the entire season.

The largest privately endowed college in the United States is Stanford University, California.

A student at the University of Ohio earns his way through school by being a member of the police department in his free hours.

Early to bed and early to rise and your girl goes out with some other guy.

Some girls marry for money, others for love and occasionally one for keeps.

SENIORS MAY CUT CLASSES.

Attendance in Harvard Classrooms is
Optional.

Roll calls are a thing of the past as far as seniors at Harvard are concerned. Since the beginning of the current semester, they go to classes and lectures when they feel like it.

The idea of the new ruling is to encourage a student body that means business and eliminate idlers. As far as is known Harvard is the first college in the United States to adopt this plan which is commonly used in England. The voluntary attendance privilege applies not only to all seniors in good standing, but also to the large number of lower classmen, who are on the "deans list." This means that 5,000 of the 7,000 Harvard students may skip class any time they wish without fear of being called on the carpet about it.

Eventually if the present experiment is found to work out successfully, the new rule may be extended to apply to sophomores and juniors, so the university officials say. But no hope is held out for freshmen. As far as freshmen are concerned the faculty feels that the plan will never be practical or desirable.—Collegio.

These Contortionists.

L. H. Doty, Jr., was injured in an automobile accident when he was run down. He was standing beside the car in which he was riding.—New Orleans Daily.

Perfect.

Editor: "What shall I say about the two peroxide blondes who made such a fuss at the game?"

Reporter: "Why, say the bleachers went wild."

"What you need is an electric

bath," said the doctor.

"Not for me," said the patient. "My uncle got drowned in one of those things in Sing Sing."—Yellow Jacket.

He: "Something seems to be wrong with this engine; it—"

She: "Don't talk foolish, wait until we get off this main road."

—John Hopkins Black and Blue Jay.

"I want to marry your daughter."

"Any tonsils or appendix?"

"No, none in my family in over a hundred years."

"Have your wife and Nexdore's anything in common?"

"Yes; they are both mad at the same woman."

Dead Easy.

Biology Prof: "Use the word 'cauterize' in a sentence."

Sleepy Stude (still thinking of St. Pats): "I knew she was mine the moment I caught her eyes."

Red: "Won't you sit in this chair?"

The Fair One: "After you."

Harvard University will from now on allow but 1,000 men to enter the university each year. This will raise the standard of the school by barring those who do not have a high enough grade average.

College students need no longer fear that four years of hard football or track will leave them with a shaky "athletic" heart in middle age. Experiments by Dr. Burgess Gordon on marathon runners have shown that the heart is strengthened rather than injured by systematic training.

A ballot is being taken at Harvard to find the students attitude toward the repeal of the Eighteenth Amendment. They are to express an opinion as to whether beer and wine should be permitted or whether it should remain as it is.

About the only way to insult a girl now is to tell her she needs a hair cut.—Rice Owl.

Freshmen at the University of Kansas must have three units of English and two of social science for entrance credit.

SPORTING SECTION

ATHLETIC ASSOCIATION TO
GIVE DANCE APRIL 10.

The M. S. M. Athletic Association will be the hosts at Jackling Gym, Saturday, April 10, for a dance given with the object of raising funds for sending Sam Craig to the National A. A. U. Wrestling Championships in Oregon. Come with a date and swell the fund.

GAMES THIS WEEK.

Monday—Lambda Chi vs. Prospectors.

Tuesday—Pi K. A. vs. Kappa Alpha.

Wednesday—Grubstakers vs. Bonanzas.

Thursday—Independents vs. Faculty.

Friday—Sigma Nu vs. Mercier.

Saturday—Lambda Chi vs. Kappa Sigs; Prospectors vs. Pi K. A.

M. S. M. CINDER PUSHERS
IN PRACTICE SESSION.

Coach Dennie's squad of wearers of the spiked shoe are about to enter the sport limelight. Meets with the Springfield Bears and the Drury Panthers are already on the trackmen's calendar and a meet for April is being negotiated.

With less than a month's practice before the first dual meet, Coach Dennie is anxious to view all his track candidates, and daily workouts are in order. The dashes, in fact all of the events, are not as well filled with candidates as they should be and all the men who signed up for the spring sport are urged to don their training togs for daily sessions.

If track is to be a success at M. S. M. the candidates must report regularly to get in condition for upholding the school at their best possible form. Irregular practice pro-

duces irregular respiration on the home stretch.

INTRA-MURAL BASEBALL
SERIES HELD UP BY COLD.

A cold wave last week waived aside two days' play in the intra-mural baseball gonfalon chase and only a quartet of games were completed. The Bonanzas and K. A.'s opened the series Wednesday in a tight tussle that was decided in the last inning with the Kappa Alphas on the large end of a 2 to 1 score. Holman and Ragland battered for the winners with Arra and Cushing in the battery department for the loser.

"Doc" Schrenk's slants proved hard to hit and the Grubstakers succumbed to the Faculty, 8 to 3, in the first game of Saturday's twin bill. Jackson supported the winning pitcher while Gammeter and Miller were unable to stop the pros.

The Independents won an 8 to 6 slugging bee from the Sigma Nus in the second contest, with Weiss and De la Pena doing the battery work for the winners. Johnson and Schaeffer, supported by Mike Ledford, were victims of the Independent ball tossers.

The champion Kappa Sig horsehide chasers routed the Merciers to the tune of 16 to 1 in the last game of the week. Smith took the mound for the winners, with Young backstopping. Huebner's left-hand slants with Donye receiving proved likable to the Kappa Sig's ash wielders.

As a group, this year's teams appear more evenly matched than has been the case before, and the championship race will probably be a mad scramble for honors.

GLADDEN-BIESECKER.

A girl in the East recently exclaimed, "Oh, those football players, they make such dependable husbands." Then Miss Audrey Biesecker, married March 21 to Sturgeon (Ozark) Gladden, star guard of the Miner football squad, should consider herself well cared for. The couple were married at DeSoto at the home of the bride's aunt, Mrs. A. F. Karte.

Congratulations!

Marriage.

"How do you find marriage?"

"During courtship I talked and she

listened. After marriage she talked and I listened. Now we both talk and the neighbors listen."

Timid Soul: "Have you any dolls?"

Clerk: "Here are some that talk."

T. S.: "Haven't you any boy dolls?"

Are You Going
Into the Bond
Business?

There is a cycle of fashion not only for the hats college men wear but for the line of work into which they go.

But your job has to fit your head as well as your hat, for it has to fit your state of mind.

Like your hat also, your job needs to fit your purse.

Therefore, why not choose one that brings not only satisfaction in service but in financial return.

Selling life insurance is one of the few modern businesses that does just this.

It takes:

**Intelligence, Zest
and Ability**

It gives:

Liberty of action, the philosophic satisfaction of selling future security and present serenity to living people, and a response, immediate and tangible, in monetary as well as mental reward.

CERAMIC ENGINEERS.

New Verse for the "Mining Engineer"
Proposed by "the Ceramic Engi-
neers."

Oh, we're Ceramic Engineers
And do not look so neat,
We may not change our underwear
Or wash our dirty feet,
And though our cuffs and collars
With clay and mud we smear,
We're the very cream of this old
earth,
Ceramic Engineers.
